

Hostile MRB - Awin publisher injection P5 close (2026-09-19)

Hostile MRB - Awin publisher injection P5 close (2026-09-19)

****Repo:**** SimonBarnett/club-madeira-awin-connector

****Tip:**** `a3ec1c7` P5: inject publisher id; persist per-tenant queue

****Supersedes for agent hand-off:**** docs/mrb-awin-publisher-agnostic-2026-09-19.md (HOLD/REWORK)

****Prior:**** mrb-2026-09-19-v1.md remains P0-P4 single-tenant ticket history only.

Verdict

****PASS** - ready for Merc hostile test

Publisher-agnostic blockers NC-01..NC-05 from the HOLD board are closed in code + tests. Dry-run default and Join stub rules still hold. ****Not**** Join-shipped. ****Not**** Merc PASS (Merc decides field UAT).

Bob engineering gate for Merc hand-off: ****open****.

Evidence

Check	Result
`npm test`	29 passed (6 files) including `t-id.test.ts`
`npm run typecheck`	clean
`2889699` in `src/`	****absent**** (only asserted-against in tests; README example tenant only)
`--publisherId` / `AWIN\_PUBLISHER\_ID`	required; MissingPublisherIdError; CLI help names both
Per-publisher queue	`data/join-queue/{id}.json`; T-ID-03 isolation
Rate limit	AwinClient per-instance; `limiterForToken`; processLimiter opt-in only
Truncation / lastSeen	envelope `truncated` + omit missing lastSeen (T-ID test)
Dry-run default	`DEFAULT\_DRY\_RUN = true`
Join write API	still `null`; worker stub needs_auth

Prior NCs disposition

NC	Disposition
NC-01 BLOCK compiled Club Madeira / 2889699 in src	****Closed****
NC-02 BLOCK no runtime publisher injection	****Closed****
NC-03 Major in-memory queue	****Closed**** (persist default on)
NC-04 Major global limiter	****Closed**** (per client/token)
NC-05 Major silent truncate / lastSeen	****Closed**** (explicit truncated; omit missing)

Nits (non-blocking for Merc hand-off)

1. Package/repo name remains `club-madeira-awin-connector` - historical; description states injection. Rename is optional product work.
2. Join / Phase 0 / U1-U8 still operator-gated - Merc must not treat stub as live Join.
3. Live `api.awin.com` not exercised in this MRB (offline vitest only).

Merc hand-off

Merc: pull `main` @ `a3ec1c7` (or newer). Use skill `merc-hostile-mrb`. Pass or fail. On FAIL return ordered fixes to Bob. On PASS tell Bob + Simon.

Bob does not claim

- Ready for shipping Join
- Merc test PASS
- Final product UAT without Merc
