

Awin connector — locked details and remaining unknowns

Addendum to the full proposal. Closes every fact public Awin docs + Merc brief can close. Eight items only Simon or Phase 0 can finish. Build agent treats LOCKED rows as constants.

1. LOCKED — do not re-litigate

Publisher	2889699 Club Madeira.
Promotion URL	https://www.clubmadeira.uk/for-awin-advertisers
API base	https://api.awin.com HTTPS. Token UI: https://ui.awin.com/awin-api. Personal token. Rights changes lag up to 10 minutes.
Auth header	Authorization: Bearer {token}. Query accessToken= still accepted on older routes.
Throttle	20 calls/min/user. Client budget 18/min.
Join write API	Does not exist in lms.txt, Publisher catalogue, Advertiser catalogue, Zapier, or third-party Awin MCPs.
Join UX	Advertisers > Join Programmes > + Join. Modal: promotional type, optional message, T&Cs, Join.
Message cap	150 characters (official EN+FR help). Not 170.
After join	Pending. Track My Programmes > Pending or GET programmes?relationship=pending.
programmedetails	relationship=joined pending suspended rejected notjoined any. Default joined. KPI includes approvalPercentage. Works for notjoined if relationship set.
programmes list	JSON array. No page/pageSize documented. One shot, cache 15 min.
Offers	POST /publisher/{id}/promotions. membership filter includes not-joined. Read-only.
Feed plane	productdata.awin.com/datafeed/list/apikey/{FEEDKEY}. Different secret. CSV gzip. XML retired.
Zapier / market MCP	No Join action.
Selection (brief)	RDS: ProductFeed=Yes, Joined=0, ApprovalRate>=99, exclude Mode=global 90 days, LastSeen DESC.
Keep	Welcome IMAP + 8am onboarding.js + partner Add Key.
Dry-run default	AWIN_JOIN_DRY_RUN=true until T-UI-05.
Caps	20 applies/day, 1 submit / 30s. Interactive batch 6-12. Cron 12.
Worker host	Not walrus, not IONOS media-host.

2. Join modal contract (from Awin help)

Nav: ui.awin.com -> Advertisers -> Join Programmes (or profile Join Programme)

Quick: + Join

Modal order: 1 promotional type (required) 2 message optional max 150
3 T&Cs checkbox 4 Join

Awin help does NOT list a Promotion URL field. Merc skill does.

Phase 0 screenshot must record: type control, URL field yes/no, T&Cs label.

Promotional type families: Content / Cashback / Communities / Comparison /

Creators / Discount Code / Editorial / Lead Gen / Loyalty.

Club Madeira is likely Discount Code + Content. Do not guess the exact option.

3. Remaining unknowns — only these eight

U1 Promotion type	Exact option selected in the live modal. Config AWIN_PROMOTION_TYPE.
U2 URL field?	Does 2026 modal still have a website/promotion URL box? true/false.
U3 Message template	whyItFits / joinRequestMessage from clubscan. Cap 150. Redacted sample.
U4 Feed key in SSM?	Separate from OAuth. If no, skip feed-list enrich.
U5 RDS from MCP host?	If no, use Awin notjoined + approvalPercentage only.
U6 Worker host name	Always-on desktop with an overnight Awin Chrome profile.
U7 AM letter	Private apply API yes/no + URL. Until written yes, B1 closed.
U8 John email cutover	Default: keep until T-UI-05 passes.

U3-U5 not closable here: [GitHub search of SimonBarnett for clubscan / AwinHighApprovalMerchants / getAwinConfig](#) returned no visible repos.

4. Phase 0 spike (closes U1 U2 + list sizes)

```
curl -sS -H "Authorization: Bearer $AWIN_ACCESS_TOKEN" \
  https://api.awin.com/publishers/2889699
curl -sS -H "Authorization: Bearer $AWIN_ACCESS_TOKEN" \
  "https://api.awin.com/publishers/2889699/programmes?relationship=pending" | jq length
curl -sS -H "Authorization: Bearer $AWIN_ACCESS_TOKEN" \
  "https://api.awin.com/publishers/2889699/programmes?relationship=notjoined" | jq length
```

then programmedetails?advertiserId=ID&relationship=notjoined
Headed: open Join modal on a row, screenshot, Cancel. Do not Join.

5. AM email (U7)

Subject: Publisher 2889699 Club Madeira – programme application API?
Is there a supported Publisher API to submit an application (promotional type, message, T&Cs)? If yes: method, URL, payload, rate limits, token. If no: confirm UI is the only supported path.

6. First ticket — implement with no more questions

- TS client: GET publishers/programmes/programmedetails; POST promotions; 18/min; redaction.
- criteria.ts 99 / ProductFeed / 90d / 150-char. RDS optional.
- Queue + dry-run apply + list_join_candidates + relationship_status.
- Worker stub returns needs_auth. Tests T-SEL T-API T-APP T-RED T-RATE.
- README with locked list, Phase 0 curl, AM email, U1-U8 checklist.

Do not click Join in Playwright until U1 U2 U6 are filled and Simon writes an advertiserId for T-UI-05.
